DAMEN UTILITY VESSELS

DAMEN UV SERIES

DAMEN

The new Utility Vessel range has been developed to support light duty work inshore and offshore. All designs have the flexibility to be adapted for a wide range of tasks.

Damen Utility Vessels are suitable for many jobs:

- pollution control
- firefighting,
- lighthouse support,
- ballast water treatment services,
- diving support operations
- survey and research work
- maintenance jobs
- repair jobs for dredgers

The 20-60 m designs feature large and unobstructed working decks, spacious accommodation and flexible spaces for either project-related stores or offices. The vessels have limited draughts so they can easily access inshore and shallow waters. As a rule, all Utility Vessels will be as simple as possible. A wide range of option packages will be offered to allow customers to configure their vessel as desired.

THE UTILITY VESSELS SERIES EMBODY DAMEN'S EXTENSIVE GLOBAL EXPERIENCE

The UV5314 concept has been designed for inshore and offshore operations. This vessel can be fitted with a DP2 propulsion system and an offshore crane to support wind farm maintenance works. Despite the shallow draught of 2.5 m, the vessel has a deadweight of 550 tons, allowing it to stay at sea for extended periods of time. The accommodation is split into three. The main deck is reserved for the project team, stores and/or workshops. The upper deck is dedicated for the crew, while the deck in between houses a meeting room, the ship's office, a large and light mess and dayroom, the galley and accompanying stores. A flex space is fitted below the main deck and can be used either to store buoy chains, liquids, equipment or it can be transformed into a moon pool.

Length over all	53.00 m	Speed	10.0 kn	Deck area	250 m ²
Beam mld.	14.00 m	Deadweight*	550 ton	Berths (min/max)	21/37
Design draught	2.50 m	Inst. prop. power	2 x 630 kW	Cabins (single)	5
		*@design draught		Cabins (double)	16

DAMEN UV 5314

- DAMEN UV SERIES**
- Simple design
 - Flexible spaces
 - Large working deck

WITH A WIDE RANGE OF WORKBOATS

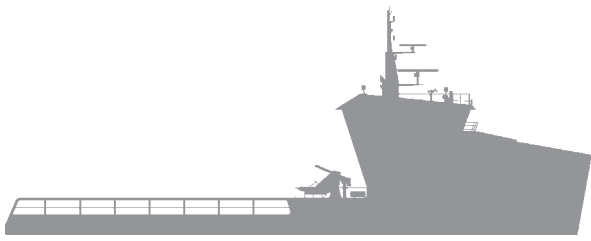

The UV2509 concept has been designed for coastal operations. It has a rule length of less than 24 metres and a very shallow draught. Twin pushbows give owners the possibility to take a barge with additional equipment or cargo along to work sites. All accommodation is above the waterline. A workshop/store is available on the main deck and a flex space is fitted below this deck. In the standard version this space is used as an extra store and is accessible from the deck through a large hatch on a coaming or from below. Alternatively, it can be used to store solid or fluid cargo, e.g. buoy chains, fuel oil, or it can be used as a moon pool.

DAMEN

Length over all	25.80 m	Speed	8.2 kn	Bollard pull	12.5 ton
Beam mld.	9.00 m	Deadweight*	55 ton	Inst. prop. power	2 x 400 kW
Design draught	1.60 m	Deadweight**	100 ton	Deck area	85 m ²
Max draught	1.85 m	**@design draught	**@max draught	Cabins (double)	3

DAMEN UV 2509

LEARNING FROM EXPERIENCE

During the development of the Utility Vessel series all of our extensive global experience with Damen workboats has been taken onboard. For each design in the range careful consideration ensures that the latest, entirely fit for purpose solutions are included.

Other Damen workboat types include:

- Damen Multi Cat
- Damen High Speed Support Vessel
- Damen Shoalbuster
- Damen Anchor Handling Tug Supplier
- Damen Platform Supply Vessel

ALL EXPERIENCE IN ONE RANGE

HIGH QUALITY DESIGN

Accommodation is designed to the highest standards with several levels of finish.
